OMNI-CHANNEL

SDB works with their clients with all types and sizes – from internationally known mass-market brands, to high-end luxury brands, to “pure play” spare parts to machinery, raw material to finished products, small business to big business and wakeup to sleep time needs of the products with multi-channel vendors. We have a proven track record of adding value to long-term retail relationships. Our logistics solutions improve service levels and enhance the consumer experience – building and protecting your brand with every touch.

We have extensive experience in integrating of your logistics needs and its solutions into omni-channel distribution operations. This eliminates excess infrastructure and inventory, while leveraging cross-channel synergies. We can streamline and automate distribution center (DC) processes to reduce cycle times and costs associated with pick-and-pack operations.

Pickup, Delivery & Its Transportation Connectivity

Our fully customizable suite of services can help you to reduce your transportation costs, increase efficiencies and enhance flexibility in rapidly changing market conditions. We provide comprehensive managed transportation solutions to clients in the Pharma, Automotive, Chemical, Granite, Food and Beverage, Healthcare, Industrial and technology sectors. SDB will work alongside you to identify opportunities for cost and labour efficiencies, such as the elimination of redundant costs, stronger communication practices, and actionable reporting, while minimizing your investments in equipment, software, facilities and personnel.

SDB completely equipped and provide full door-to-door freight services with a special service of Indian customs to Shipper & Consignee door pickup and its delivery either for Exports or for Imports.

- ☐ Complete transportation arrangement for Air Freight and Sea Freight (LCL, FCL, Breakbulk, Project cargo etc..)

HUB OPERATION FOR REGIONAL AND GLOBAL DISTRIBUTION

The niche market we operate is unique connectivity to the world from the India silicon valley & IT hub and we utilize the opportunity to create a global HUB of logistics ERA, with minimum procedural and legislative barriers, including a nominal customs inspection policy for cargo operations within the zones, which is ideally suited to optimize the supply chain of large scale multi-national and transnational organizations.

The unique business models and solutions developed by SDB with this IT HUB we offers an unmatched flexibility and cost effectiveness compared to other regional zones and cargo hubs. The Zone has a positive impact on organizational profitability by eliminating the need to operate storage and distribution centers in multiple locations and thus significantly reducing overheads.
